HOW TO START TOMATO PLANTS. Dear Social Corner Sisters: I would like to tell you of my success in starting tomato plants. It might be of help to some other amateur. I take well rotted manure and mix equally with the soil. I then pour plenty of boding water over stand two or three days to dry out, then all my flats and plant the seeds. Keep them in a sunsy window—a south one is best. Do not let them get too dry. In about ten days you will see them come through the ground. Keep the box turned every few days so plants will not grow crooked. When they have made their fifth leaf, transplant into small Steam two house pots.
